But this is only one part of Minecraft, the real fun part comes when players start to build furniture, create rooms, ships or even whole towns. In the beginning of the game players will probably only know how to mine for stone and wood. If they want to build something they have to find these items in the world. But there are other materials out there as well like gold, diamond and even iron.",

What is a Minecraft Server Offline Mode? " The offline mode for a Minecraft Server means that all of the plugins are turned off and you can just play the game as if it

were only you on the server. This is nice for those who just want to play Minecraft on their servers without having to worry about anyone else's creations. It does not mean that you are left in your own world, but rather that your server will be private and no one else can connect unless they know your IP address. If someone were able to connect, then they would simply see a world that is completely empty with no buildings or trees. The only way that anyone would be able to connect to your private server would be from a direct connection through the same IP address that you provide in your network settings. If you do not want to use this method, then simply make sure that nothing can be edited by anyone except for yourself.",

How do I join my IP Address to a Minecraft Server? â€“ To connect to a Minecraft server, you will need an IP address or host name of the server. Connecting your Minecraft server via your IP address is the same as connecting to it directly through the internet without requiring any extra software. The primary way to get an IP address is by going into your internet browser's settings page and finding out what the current addresses given from your provider are for you. If you are using a Bukkit or Tekkit server, then this should be included with their connection instructions. With individual servers, there are a couple ways that you could go about getting this information. The first way would be to simply ask the host if you can connect to their IP address and they will give it to you. Otherwise, you can go through your router configuration page to find out the information that you need.",

Some players use a variety of hacks, cheats and exploits to gain an advantage over other players. These are typically known as "maphacks" and give players the ability to see through walls, fly around the map, teleport between locations, and relocate blocks from one place in the map to another.",

The game utilizes a block-based mining and crafting system. As in Minecraft, players can gather resources such as blocks of wood, stone, ores, plants, and foodstuffs from the environment to use in crafting. While players are able to craft a variety of basic weapons such as axes and swords using these materials, they will need to gather blueprints for advanced items such as firearms and explosives. The game features combat between players where every player has access to health regeneration; this prevents battles from lasting indefinitely and makes it more viable for players to attack each other with melee weapons instead of guns.",

Minecraft Creative has a variety of different options and settings for your game that will give you complete control over it. You can change almost everything about the world from the seed number to what biomes appear on your server. You can also choose weather, day length, time of day or create custom rules that will automatically apply certain environment settings and visual effects. The possibilities are endless but if you want to start playing with these options, you must have Forge installed.",

"Rust"s central gameplay is available in both singleplayer and multiplayer modes. When playing on a server with other players, combat is enabled and players must fight or flee from other hostile players who are also scavenging for resources. If a player is killed by another player they will not be able to respawn until they have been to a specified area of the map which acts as the game's 'spawn point'.",
